Notes: ng/L = nanograms per liter. NL = Notification Level. RL = Response Level based on average of last 4 quarters. OOS = Out-of-Service. NA = Not Available. NS = Not Sampled. ND = Not Detected at or above the Consumer Confidence Report Detection Level (CCRD) which is 4 ng/L for the above analytes; ND is assigned a zero value when averaging. Results were rounded to the nearest whole number before averaging.

\*Sample collected downstream of the Mocho Groundwater Demineralization Plant (MGDP). All Mocho wells can be treated at the MGDP. Mocho 1 is a standby emergency well which is currently OOS. Mocho 2 and/or 3 is blended/treated before discharging to the distribution system.

\*\*Sample collected downstream of COL Chloramination Facility. COL wells are blended before distribution to the system.

\*\*\*Only detected analytes above CCRDLs from EPA Method 537.1 are shown on the table; PFOS = perfluoro-octane sulfonic acid, PFOA = perfluoro-octanoic acid, PFBS = perfluorobutane sulfonic acid, PFHxA = perfluorohexanoic acid, PFHxS = perfluorohexane sulfonic acid.
