

RFI Responses (as of February 15, 2023)

Q: Does Project concept as proposed in Attachment A allow for refinement or alternative approaches?

A: Zone 7 seeks to balance innovation with risk in implementing the Project and expects Proposer(s) to take the Project concept in the RFP as a baseline for the design approach. A key Project objective is to incorporate elements outlined in the Project concept to the greatest extent possible, while allowing for refinement of location, quantity, and dimensions of each element throughout the design process.

Q: Does overall Project budget as proposed in Attachment A allow for budget reallocation between tasks (e.g. for design)?

A: Proposed budget is for grant reimbursement purposes, which preclude reallocation. Any costs that exceed those proposed in the approved grant will require justification and approval by Zone 7.

Q: Can Proposer(s) assume the Late Finish date of Summer/Fall 2025 as part of planning timeline for design?

A: Zone 7 expects Proposer(s) to adhere as closely as possible to the Early Finish dates, as the grant funding will sunset Fall of 2025.
